NP III Application Update (6/21/2017)

The current version of the NP III application is version 1.0.0.4. The prior version was 1.0.0.3. This document will show how to apply the update. This update will update all prior versions to the most current version, 1.0.0.4.

I have a folder named NP_III that contains my NP III application:

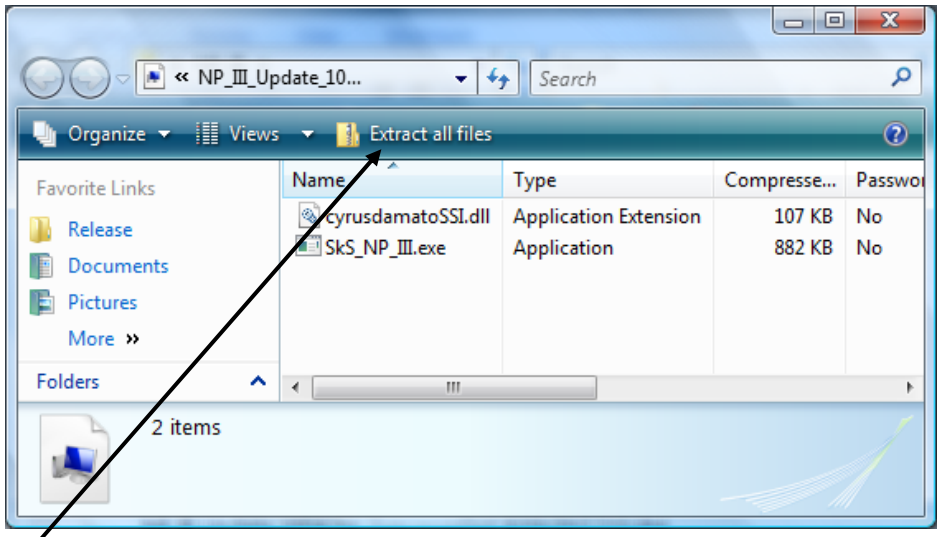

From the NP III Website I've downloaded the zip file containing the update by clicking on the link named: ***NPIII_1004_Update***. I've placed the zip file into my NP_III folder.

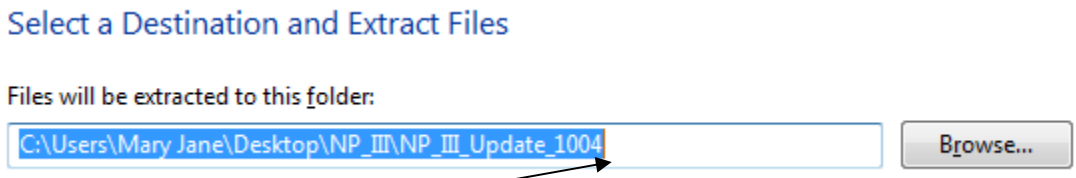

Double-Click on the zip file

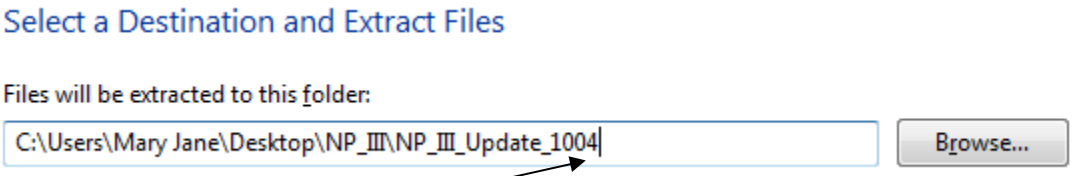

The opened zip file is displayed in a dialog box listing the two files needed to update the NP III application:

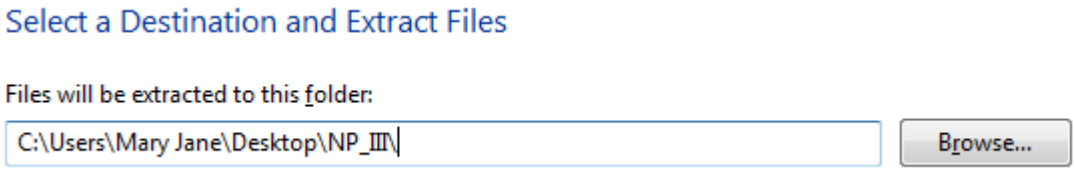

Click on the Extract all files button located within the dialog box.

Using the mouse, click at the end of the Path

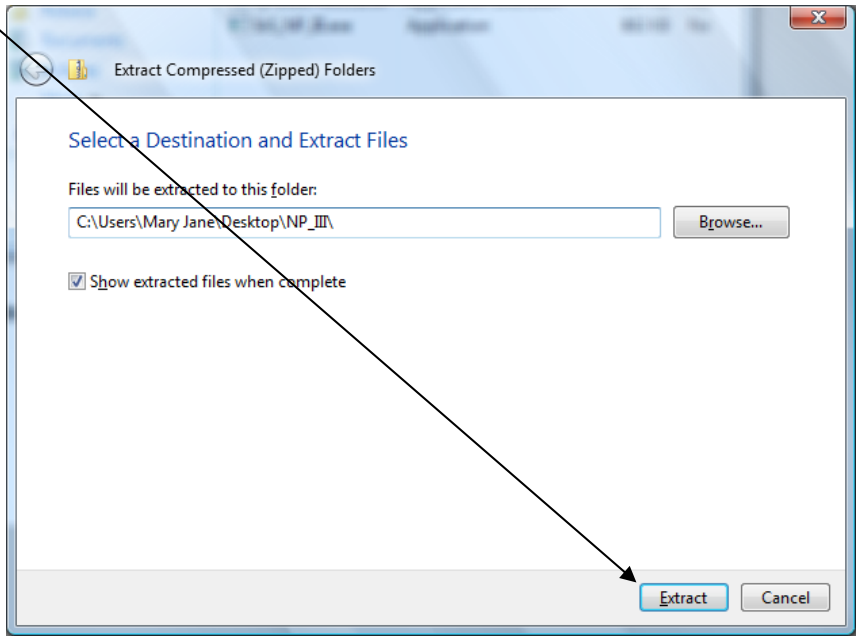

Using the Backspace key on the Keyboard, remove the NP_III_Update_1004 text

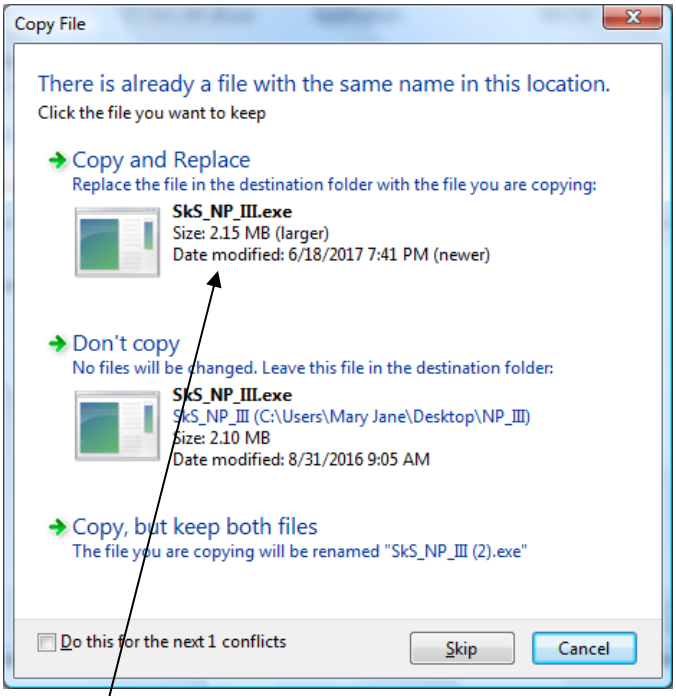

The zip Dialog box should resemble the above picture

Click on the Extract button at the bottom of the Dialog Box

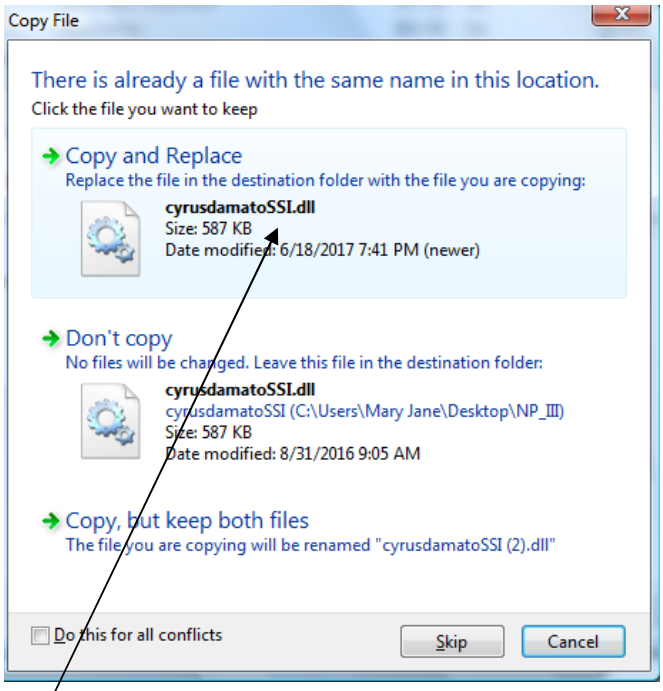

Because you are replacing the existing file with an updated file with the same name you are presented with the following Dialog:

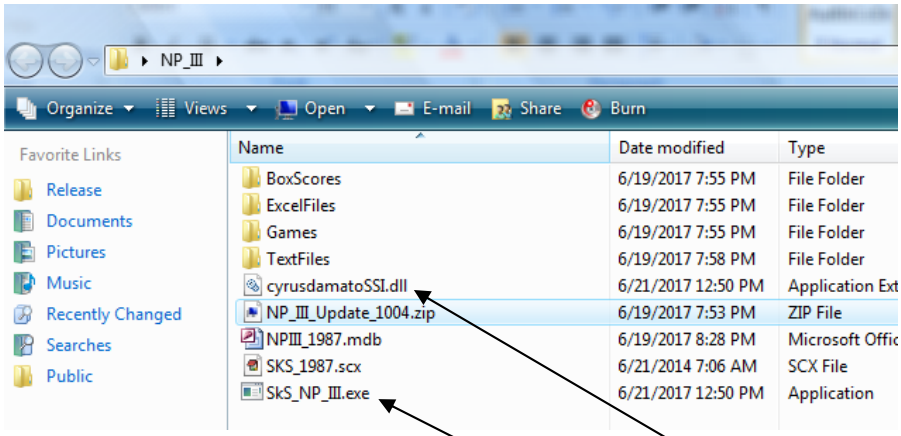

Using the mouse, click on the Copy and Replace section of the Dialog box

A second similar dialog will appear asking the same question (Copy and Replace):

Using the mouse, click on the Copy and Replace section of the Dialog box (a second time).

Your NP III folder will now contain the updated program files (SkS_NP_III.exe & cyrusdamato.dll). When you run the application check the About box to verify the version (1.0.0.4).
